Clinical Best Practice Programs

Evidence-based medicine can translate to better clinical practice and patient care to help shorten learning cycle and employ proven methodologies. GE Healthcare Best Practice Programs use evidence based medicine to help

- **Improve patient care**
- **Reduce costs, and**
- **Retain your best people.**

Working with clinical experts, we identify the most critical challenges facing patient care today, and develop courses that combine evidence-based clinical research and practice in a dynamic online learning format. GE Healthcare joined critical care and leading experts to create comprehensive, interactive programs promoting improved patient care. Courses are clinically relevant. Learning is self-paced, interactive and immediately applicable. See how our programs can help reduce length of stay, minimize risk, and improve clinical accuracy in managing your patients.
